

Search Tools: Summary and Comparison of Commands

The table below summarises and compares a selection of the advanced search commands that are available in Google, Bing and DuckDuckGo. (Yandex will be added shortly).

A list of Google's advanced search operators compiled by Google's own Dan Russell can be found at <https://docs.google.com/document/d/1ydVaJJeL1EYbWtlfj9TPfBTE5IBADkQfZrQaBZxqXGs/>.

There is a full list of Bing's commands at <https://msdn.microsoft.com/en-us/library/ff795620.aspx>.

DuckDuckGo's syntax is at <https://duck.co/help/results/syntax>.

	Google www.google.com	Bing www.bing.com	DuckDuckGo http://duckduckgo.com/
Default search	Automatically looks for synonyms and variations on your terms. Drops words from your search if the number of results is low or zero.	Automatically looks for synonyms and variations on your term. Usually searches on all of your words but has started to drop terms if the number of results is low.	All of your words but drops terms if the number of results is low or zero.
